

Jackson's ● ● SHIRO HOG BRISTLE - Series 363, 364, 365

While lower cost bristle brushes are boiled to straighten hairs and then bleached to uniform the colour, The Shiro does not undergo any harsh treatment processes such as boiling or leaching as with other hog brushes. The end result is a long lasting, high quality brush that boasts all the finest characteristics of natural hog hair. The Shiro is a brush Jackson's is proud to call its own.
